PREMIUM ACCESS

USE TELLDUS LIVE! AT ITS FULL POTENTIAL

For those who don't want to settle for the basic, and want the very best, we have developed Telldus Live! Premium. It provides access to many smart features in addition to the standard features of Telldus Live! which all users have access to.

SENSOR HISTORY

Get access to unlimited sensor history with Telldus Live! Premium.

MORE SENSOR VALUES

Sensor values for history are saved at 5 minute intervals instead of 10 minutes. All values are still pushed to Telldus Live! and to third party applications.

SEND SMS

Send automated text messages from your Telldus Live! Account. You get a few credits with your subscription and you can buy more credits when you need.

SEND EMAIL

Send automated emails when events are triggered in your Telldus Live! Account. Perhaps a safety system for the temperature in the fridge?

BLOCK HEATER

Make sure the engine is warmed up right when you need your car. With this function, the engine heater automatically starts at the right time based on the outdoor temperature.

URL ACTIONS

Call URLs from your events. This opens up to connect your events with other services in a very flexible way.

EVENT CONDITIONS

Combine multiple event conditions with AND. This provides a much higher degree of flexibility to fine-tune when your events are performed.

EARLY ACCESS

As a Telldus Live! Premium user, you get early access to new smart features. Be first with the latest!
